

‘Does Egyptian History Fit with the Bible?’

“Were the Israelites ever in Egypt?”

Intro: Secular ‘experts’ have often claimed that there is *no evidence* that the Hebrews lived in Egypt. If this is so, then the entire history of the book of Exodus—which is foundational to understanding God’s dealings with humanity throughout history, and which is repeatedly referred to throughout the rest of the Bible—is a lie!

Are these ‘experts’ correct? Or, if they are wrong, how could they be *so* wrong?

In this video, author, and speaker, Gary Bates, presents a fascinating and helpful look at the many ways in which Egyptian history lines up perfectly with biblical history.

The evidence is there, provided you look in the right time period!

What made Egypt unique in the ancient world?

How can we know when the Israelites were in Egypt?

When were the Israelites enslaved in Egypt?

How can we determine the date when the Exodus happened?

Who was the Pharaoh at the time of the Exodus?

Why don't secular experts acknowledge that all this evidence matches the Bible?

Notes for personal study:
